NORBU

BRAND GUIDELINES

Website edition · Spa & Wellness

THE NAME

Norbu means *jewel*: something precious, kept with care, that shines once it is cleaned of dust. That is the promise of every Norbu space. People come to rest, to be cared for and to leave clearer than they arrived.

This edition sets the rules for the Norbu website: how the logo, colour, type, icons and components behave on screen, so every page feels as calm as a treatment room.

BRAND ESSENCE

Restore the jewel within.

Calm
Generous space, slow rhythm, nothing that shouts.

Grounded
Honest words, clear prices, easy booking.

Precious
Every guest and every detail treated with care.

01
LOGO ON THE WEB

Wordmark · Primary Web Logo · Sizes & Clear Space · Division Lockups · Usage

The Wordmark

NORBU is set in heavy, open capitals that stand on a single continuous line. The wordmark is the whole identity: no separate symbol, only the name, said clearly.

The Grounding Line

Every letter stands on one rule that runs the full width of the name, like the floor beneath a meditation mat. Stability first.

The Threshold

Under the R the line opens. The R steps down onto the rule and its leg strides through the gap, like a guest crossing from everyday life into care.

The Stone Shadow

On white, a soft offset shadow gives each letter weight, as if carved in stone. The reversed version drops the shadow for a cleaner look on plum.

Primary Web Logo

Reversed white on Norbu Plum is the signature look of the website. Use it in the header, the footer, the mobile menu and over the Dusk gradient.

Use the full-colour version (plum with Stone Shadow) only on white sections, emails and documents generated from the site such as booking confirmations and invoices.

> Export the logo as SVG for the site, so it stays sharp on every screen. Keep the PNG versions for email and social.

Sizes & Clear Space on Screen

Keep clear space of **half the cap height** of NORBU on every side. In the header this is simply the vertical padding of the bar.

HEADER	160 px wide on desktop · 120 px on mobile
FOOTER	180–220 px wide, reversed white
EMAIL	180 px wide, full colour on white
MINIMUM	120 px wide (wordmark) · 180 px (with descriptor)
FAVICON	The wordmark is too wide for a favicon. Use the lotus icon in white on a plum circle (page 23).

DIVISION LOCKUPS

Each division gets its own section of the site. Its pages use the division lockup in the header (reversed white on plum) so guests always know where they are. All divisions share the same colours, fonts and icons; no division gets its own colour.

LOGO USAGE

When in doubt, use the reversed white logo on plum.

White on Norbu Plum.

White on the Dusk gradient.

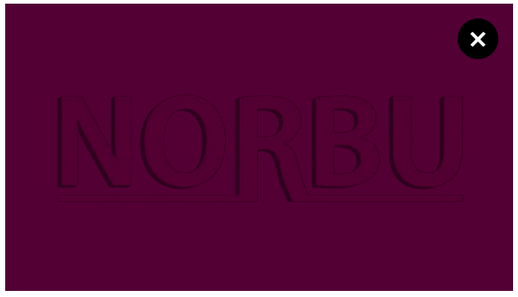

Full colour on white.

Do not stretch or squash.

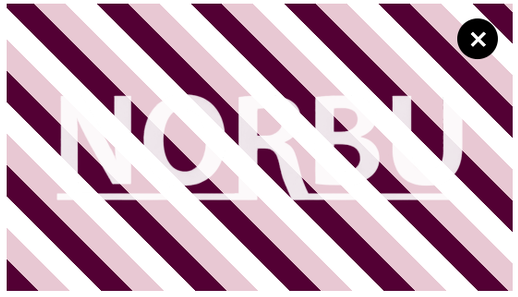

Do not recolour.

Do not put plum on plum.

Do not put white on white or pale photos.

Do not place on busy patterns.

COLOUR

Brand Colours · Dusk Gradient · Interface Tints · Accessibility

BRAND COLOURS

Three colours, nothing more. Norbu Plum leads, white gives the site its calm and space, and black carries the reading text. Restraint is the point: a quiet palette feels like a quiet room.

Black

Norbu Plum

A deep, jewel-dark plum taken directly from the wordmark. Calm, dignified and warm, the colour of a gemstone held in shadow.

On the website

Header and footer bars, primary buttons, headings, icons, links, active states and the background behind the reversed logo.

White & Black

White

The main page background. Most of every page should be white, which is the breathing room of the site.

Black

Body text, form input text and fine print. Never use black as a background or for large headings; those belong to plum.

Colour Proportion

65% White | 25% Plum | 10% Black

Interface Tints

The site needs a few softer steps for borders, hover states and quiet section backgrounds. These are tints of Norbu Plum, not new brand colours. Use them only in the interface.

Hover | Base | Muted | Disabled | Border | Section bg

DUSK GRADIENT

The single signature gradient. It moves from Norbu Plum into a soft blush, like evening light settling over the hills at the end of a treatment.

Symbolism

Rest · Tenderness · Inner calm

Use it for

The homepage hero, page banners, booking confirmation screens, promotional strips and social graphics. Always with white text and the reversed logo, kept on the plum side of the gradient.

Don't

Don't use it on buttons, cards or small elements, and don't put body text over the light end.

ACCESSIBILITY

Text on the site should pass WCAG AA (4.5:1 for normal text, 3:1 for large text). The combinations below are measured.

> Norbu Plum on white is so strong that it works for every text size, including links inside body text.

TYPOGRAPHY

Primary Font · Secondary Font · Web Type Scale · Alternative Pairings

PRIMARY FONT

Plus Jakarta Sans

A clean, open sans-serif with soft, round forms. Friendly without being casual and very readable on phones. Free on Google Fonts.

On the website

Navigation, body text, buttons, forms, prices, labels and section headings (ExtraBold, uppercase).

Descriptor style

Small labels above headings echo the logo descriptor: Bold, uppercase, 0.4em letter-spacing.

ICONOGRAPHY

Icon Style · Icon Library · Icons in Use · Favicon

ICON STYLE

Norbu icons are thin, rounded outlines: light and calm, never heavy or filled. They are built on the open-source Phosphor Icons (Light weight, MIT licence) with four custom spa icons drawn to match: meditation, hot stones, singing bowl and essential oil.

WEIGHT	Light line, rounded ends and corners. No fills, no duotone.
COLOUR	Norbu Plum on white; white on plum or Dusk. Never black.
SIZES	20 px inline · 24 px in buttons and lists · 32–48 px for service tiles.
CONTAINER	For service tiles, place the icon in a circle of #F5EFF3, with the icon at about 55% of the circle.

06

WEBSITE LAYOUT

Homepage · Mobile · Photography · Voice

Homepage

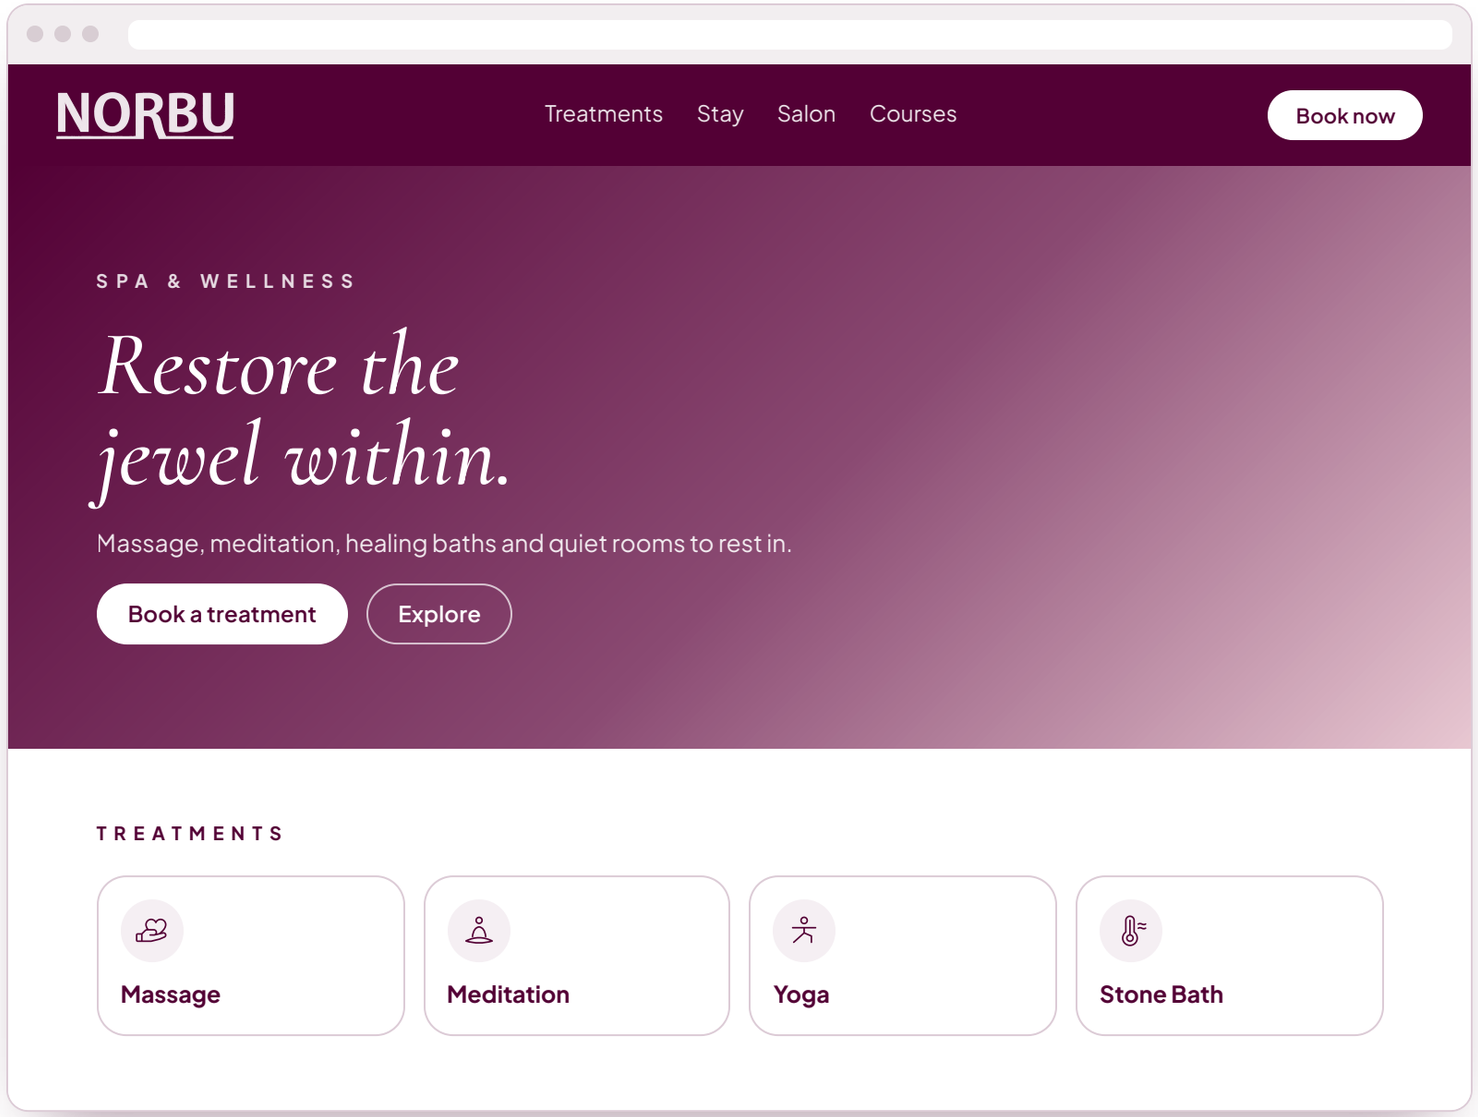

Plum header, Dusk hero with an italic Cormorant headline, then white space and service cards. The page gets lighter as it scrolls, like settling into a treatment.

Section rhythm

Hero (Dusk) → services (white) → about (#F5EFF3) → testimonials (white) → booking strip (plum) → footer (plum).

Spacing

Base unit 8 px. Section padding 96 px desktop, 64 px mobile. Content width 1200 px.

Mobile

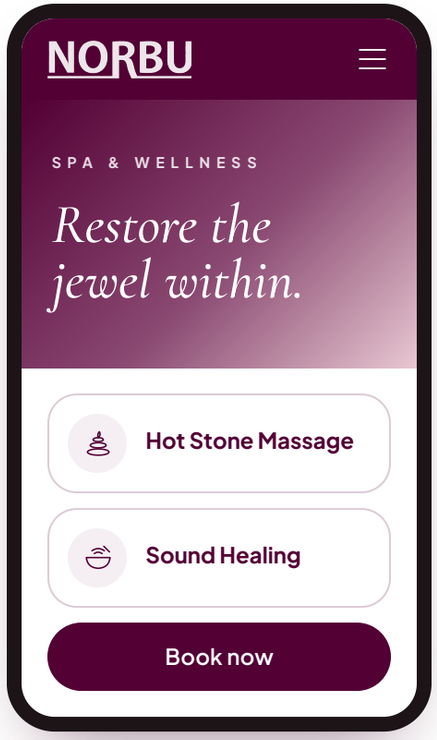

Most guests will book from a phone. The logo shrinks to 120 px, links move into a menu, and a "Book now" button stays visible at the bottom of the screen.

Photography

Natural daylight, soft focus and real textures: wood, stone, linen, steam, mountains and hands at work. Warm and slightly muted, never over-saturated. Show people relaxed with eyes closed or looking away, not posing for the camera. Avoid stock clichés like orchids on stacked stones and bright blue water.

Voice

Short, warm, unhurried sentences. Speak to one guest ("you"). Name the treatment, the time and the price plainly.

NORBU

Restore the jewel within.
